21 DAYS CHALLENGE

Focus Area:

Today’s focus is on increasing vocal variety by getting better at intonation using a simple exercise called the Siren Technique.

Instructions:

Step 1: Grab any book and turn to a random page.

Step 2: Start Reading from Low to High Pitch
Example:
“The quick brown fox jumps over the lazy dog.”
(starting low and gradually getting higher)

Step 3: Now, start reading from a high pitch and slowly come down to a low pitch.
Example:
“The quick brown fox jumps over the lazy dog.”
(starting high and gradually getting lower)

Goal: As you read, you might notice some breaks or pauses. This happens because you're switching between pitches too quickly.

Your goal is to smooth out these transitions and minimize the breaks.

Tip: To avoid these breaks, try to transition between pitches or sound notes little slowly and steadily. This will help you maintain a smooth and an even flow.
